ABSTRACT

This document is a compilation of data collected from the 2001 Colorado Public Library Annual Report sent to each Colorado public library jurisdiction in January of 2002. State totals, grouped by the size of the population served, report data for general information, paid staff in full-time equivalents (FTEs), library funding sources, staff expenditures, materials expenditures, other expenditures, selected library materials, library hours and service, program offerings, program attendance, interlibrary lending, circulation, input measures (i.e., FTE ratios, items per 1,000 served ratios, square footage per capita funding ratios, percentage of operating expenditures), services per capita, and children's services as percentage of total. Data for individual libraries includes addresses, phone and fax numbers, Web sites, directors, borrowers, outlets, bookmobiles, staff in FTEs, computers and networking, library income, staff expenditures, expenditures on library materials and resources, miscellaneous and total expenditures, selected library materials, circulation, public service hours, visits, reference transactions, interlibrary loans, program offerings and attendance, input measures, output measures, salaries and wages, and square footage. FOREWORD

Statistics and Input-Output Measures for Colorado Public Libraries, 2001 is made possible by the teamwork between the public libraries of Colorado and the Colorado State Library. It is the compilation of data collected from the Colorado Public Library Annual Report sent to each public library jurisdiction in January of 2002 and returned in March.

Web Page Publication Site: This publication is available in both Adobe portable document file format (.pdf) as well as Excel (.xls) at the LRS web site, http://www.lrs.org/

Response Rate: The 2001 response rate for libraries was excellent: 100% percent of Colorado public libraries answered the annual survey in a timely manner. In addition, over 100% of the Colorado libraries used the online survey.

Requests for Paper Editions: Requests for this or any LRS printed publication may be made at any time to Administrative Assistant Stephanie Kean by phone at (303) 866-6906 or by e-mail at kean_s@cde.state.co.us.

Federal Submission: The Colorado State Library submits an annual report to the National Center for Education Statistics (NCES) for the Federal State Cooperative System (FSCS) for Public Library Data. A report from NCES, ranking all the states, is published each year in paper and electronic formats. Many of the items requested in the Annual Report are required for this submission.

Profiles Report: The 2001 COLORADO PUBLIC LIBRARY PROFILES can provide further analysis of public library statistics in conjunction with this document. They can be viewed at http://www.lrs.org/.

This publication was produced by the Library Research Service at the Colorado State Library with funds from the Library Services and Technology Act (LSTA).

Definition and Uses of LRS Ratios and Measures

ATTENDANCE AT CHILDREN'S PROGRAMS AS PERCENT OF TOTAL ATTENDANCE

Libraries provide programs to inform, educate, and entertain their clients, and to promote further library use. This measure relates the number of persons of all ages attending library-sponsored programs directed at children to all persons attending programs of all kinds. It is one indicator of how successful a library has been in planning children's programs.

CIRCULATION OF CHILDREN'S MATERIALS AS PERCENT OF TOTAL CIRCULATION

This statistic compares the circulation of children's materials to the library's total circulation. Note that it is a measure of children's *materials* circulated, regardless of the age of the borrower. It is helpful to examine this statistic when considering library service to children.

CIRCULATION PER CAPITA

Circulation per Capita relates the number of library materials lent to the number of persons the library serves. It is annual circulation divided by the library's legal service area population, and indicates the average number of loans made to each resident annually. Lower Circulation per Capita can be a result of lower Materials Expenditures and Volumes Held per Capita. It is also likely to lead to more ILLs per 1,000 Circulation.

COMPUTER FILES PER 1,000 SERVED

Computer Files per 1,000 Served relates the number of computer files in the library's collection to the size of the population it serves. It includes units such as CD-ROMs and computer software packages divided by the population served in thousands. This statistic is a measure of the size of the library's computer files collection relative to the population it serves.

EVENING & WEEKEND HOURS AS PERCENT OF HOURS OPEN

This figure shows the percent of hours the library is open after 5 o'clock p.m. and on the weekends, compared to all hours the library is open to the public.

ILL NET LOAN RATE

ILL Net Loan Rate relates the number of materials lent to other libraries to the number of materials borrowed from other libraries through interlibrary lending. It is calculated by dividing the number of items lent by the number of items borrowed. This output measure is relevant whenever the library's participation in interlibrary loan activities is an issue. It indicates whether the library does more lending (scoring over 1.0) or more borrowing (scoring 0.90 or less). "Net borrowers" may use this figure as evidence of what they gain from participating, while "net lenders" may use it to argue for the maintenance of strong collections.

ILL'S PER 1,000 CIRCULATION

ILLs per 1,000 Circulation relates the number of materials borrowed from other libraries to the number of materials in the local collection available to borrowers. It is the number of ILL borrows divided by total circulation and then divided by 1,000. This measure indicates the number of interlibrary borrowing per 1,000 items circulated from the collection. A higher figure of ILLs per 1,000 Circulation might indicate better performance by the library as a point of access for information not in the local collection. A lower figure might indicate that the local collection was meeting user needs. The interpretation of this statistic depends on which issue is at hand as well as the actual amount of ILL and circulation activity per capita. Higher levels of ILL and circulation activity favors the former interpretation, while lower levels of such activity favors the latter interpretation.

LEGAL SERVICE AREA POPULATION (LSA)

This is the number of people in the geographic area for which a public library has been established to offer services and from which (or on behalf of which) the library derives incomes, plus any areas served under contract for which the library is the primary service provider.

LIBRARY VISITS PER CAPITA

Library Visits per Capita relates the number of annual library visits to the number of persons the library is established to serve. It is attendance at the library during a typical week multiplied by 52 (weeks per year) divided by the library's legal service area population. This measure may be estimated by counting the number of persons (excluding library staff, of course) who enter -- or, if preferred, leave -- the library during a typical week. A typical week is one during which the library is open its regular hours (no holidays) and which is neither extraordinarily busy nor slow. Because Library Visits per Capita indicates the average number of library visits per person served, it is a better measure of public awareness and use of the library than Registration per Capita. Because registration statistics may be out-of-date and, therefore, questionably valid, attendance statistics reflect actual visits to the library. Taken with Reference, Circulation per Capita, and Program Attendance per 1,000 Served, Library Visits per Capita can be used to develop an annual profile of library use.

LOCAL INCOME PER CAPITA

Local Income per Capita is perhaps the best single measure of the library's financial support, as the vast majority of operating income comes from local sources. This is the total local income amount (from city, county, district, or other sources) divided by the number of persons that the library was established to serve. Knowing the extent to which libraries are supported by their local funding base is valuable information for public librarians and their governing boards when submitting and defending budgets.

MATERIALS EXPENDITURES PER CAPITA

Materials Expenditures per Capita relates library funds spent on materials for the collection (e.g., books, periodicals, and non-print items such as audio and video cassettes) to the number of persons the library was established to serve. It is the dollar amount spent on materials divided by the library's legal service area population, and indicates the average cost per person of purchasing newly acquired materials. This figure does not take into account the cost of processing library materials. Materials Expenditures per Capita is relevant whenever the size or usefulness of the collection is an issue. When addressing this issue, relate other input measures indicating the quantity of materials available, such as Volumes Held per Capita; also relate output measures that indicate the usefulness of materials such as Circulation per Capita, Turnover Rate, ILL Net Lending Rate, and ILLs per 1,000 Circulation. It is also important to review Materials Expenditures per Capita whenever the population of the library's legal service area changes quickly.

MATERIALS EXPENDITURES AS A PERCENT OF OPERATING EXPENDITURES

Materials Expenditures as a Percent of Operating Expenditures relates the amount spent on the library's collection to what is spent for overall operations. It is the cost of library materials divided by the amount spent for all operating expenses including materials costs. This measure indicates the proportion of the library's operating expenditures that is set aside for materials. This may indicate a library's commitment to its collection. However, an extremely high figure on this measure can also indicate a library's lack of commitment to paying staff that is usually a major cost. To interpret this measure, take into account "other operating expenditures." A library may pay large bills for online utilities and telecommunications services for database searching. For comparisons, use libraries which have similar "other" expenses.

OTHER EXPENDITURES PER CAPITA

Other Expenditures per Capita relates the amount of library funds spent for purposes other than staff and materials costs to the number of persons the library is established to serve. It may include the dollar amount spent on miscellaneous operating expenses including rent, utilities, telephone and telecommunications, computer services, office supplies, and postage divided by the library's legal service area population. This figure approximates the average cost per person of running library facilities. This input measure may be relevant whenever the economy or efficiency of the library's day-to-day operations is an issue. The cost-effectiveness of library operations may be demonstrated by relating Other Expenditures per Capita to those output measures which best reflect the range of most frequently used services and programs the library provides to its users.

PROGRAM ATTENDANCE PER 1,000 SERVED

Program Attendance per 1,000 Served relates attendance of scheduled presentations which are sponsored by the library (on or off library premises) to the population the library is established to serve. It is program attendance divided by the library's legal service area population in thousands. It indicates the number of residents per 1,000 in the library's legal service area who attended a library program during the year. This output measure may be relevant whenever the library needs to demonstrate its services to groups.

REFERENCE QUESTIONS PER CAPITA

Reference per Capita relates the annual number of information contacts with a staff member using information sources to the number of persons the library is established to serve. It is the number of reference transactions per typical week multiplied by 52 , then divided by the library's legal service area population. This measure indicates the average number of times a resident of the library's legal service area received staff assistance in using information sources available at or accessible through the library. Reference per Capita may be relevant whenever the impact of reference service is an issue. Comparing this figure to Circulation per Capita may be useful in evaluating the reference desk as an access point for information available in the local collection. Comparing it to ILLs per 1,000 Circulation and ILL Net Lending Rate may be useful in evaluating access via the reference desk to information that may not be available locally.

REGISTRATION AS A PERCENT OF POPULATION

Registration as a Percent of Population relates the number of persons registered as borrowers to the number of persons the library is established to serve. It is the number of individual registrations divided by the library's legal service area population. This measure indicates the percentage of the library's potential users who have demonstrated an intent to borrow materials from the collection. This output measure may be relevant whenever public awareness of the library is called into question. Assuming a library's registration file is up-to-date, this figure indicates the percentage of potential users who know the library exists and have implied an intent to use it. High Registration per Capita may also be useful in justifying increases in input measures (such as Staff, Materials, and/or Miscellaneous Expenditures per Capita). NOTE: All registration figures reported by Colorado public libraries are included here. Registration figures that have not been updated in the past three years should be regarded as questionable.

STAFF PER 100 REFERENCE

Staff per 100 Reference relates the size of the library's staff to the number of reference questions the staff handles. It is the number of staff in FTEs (see Staff per 1,000 Served) divided by total annual reference questions (or reference questions per typical week multiplied by 52) in hundreds. This statistic measures staff workload relative to reference services provided.

STAFF PER 1,000 SERVED

The definition of public library as set forth in Public Library Standards for Colorado 1998 includes the following stipulation: "[A public library must] have paid staff person(s) present during all hours of service." (p. 2) Staff per 1,000 Served measures the level of staffing relative to the legal service area population. It is the number of library staff in Full-Time Equivalents divided by the number of persons in that area. Full-time equivalent (FTE) staff is calculated by adding the total number of hours per week worked by all staff and dividing by 40. In this context, full-time means 40 hours per week, regardless of how many hours per week the library is open. This input measure may be relevant whenever the adequacy of library staffing and staff funding are issues. It is particularly useful when the population or geographical area that the library serves increases dramatically. When that happens, there should be a corresponding increase in staff to offset the population increase.

STAFF PER 10,000 CIRCULATION

Staff per 10,000 Circulation relates the size of the library's staff to the number of items circulated. It is the number of staff in FTEs (see Staff per 1,000 Served) divided by total annual circulation in tens of thousands. This statistic measures staff workload relative to circulation.

STAFF EXPENDITURES AS A PERCENT OF OPERATING EXPENDITURES

Staff Expenditures as a Percent of Operating Expenditures is the sum of all staff expenditures for salaries, wages, and benefits divided by the sum of all operating expenditures for staff, materials, and other purposes. This measure indicates the proportion of the library's annual operating expenditures that is spent to compensate staff. Generally, this figure comprises the single largest proportion of operating expenditures. If this figure is extremely high, however, it may indicate a lack of adequate funding for other aspects of library operations; and, if extremely low, it may indicate a lack of commitment to having professionally trained library staff.

STAFF EXPENDITURES PER CAPITA

Staff Expenditures per Capita relates the amount of library funds spent on staff to the number of persons the library was established to serve. It is the dollar amount paid in salaries, wages, and benefits divided by the library's legal service area population. This figure indicates the average cost per person of staffing the library.

This input measure may be relevant whenever the adequacies of library staffing or staff performance are issues. The cost-effectiveness of library services may be demonstrated by relating Staff Expenditures per Capita to output measures which indicate the amount of service received such as Circulation and Reference Transactions per Capita, and Program Attendance per 1,000 Served.

It is also important to review this measure whenever the population of the library's legal service area grows quickly. For example, if population increases dramatically, there should be a corresponding increase in Staff Expenditures per Capita just to maintain the existing level of support.

SUBSCRIPTIONS PER 1,000 SERVED

Subscriptions per 1,000 Served relates the number of current serial subscriptions carried by the library to the size of the population it serves. It is the number of current serial subscriptions divided by the population served divided by one thousand. This statistic is a measure of the size of the library's current periodicals collection relative to the population it serves.

TOTAL EXPENDITURES PER CAPITA

Operating Expenditures per Capita relates total library funds spent for all purposes to the number of persons the library serves. It includes the dollar amount spent on staff, materials, and miscellaneous expenses divided by the library's legal service area population. This figure approximates the average cost per person of running the library. Operating Expenditures per Capita may be relevant whenever the efficiency of the

library's overall operation is an issue. The cost-effectiveness of operations may be demonstrated by relating Operating Expenditures per Capita to those output measures which best reflect the range of most frequently used services and programs the library provides to its users. It is also important to review this measure if the library's legal service area changes dramatically. For example, if the population increases substantially, there should be a corresponding increase in Operating Expenditures per Capita just to maintain the existing level of support.

TURNOVER RATE
Turnover Rate relates the number of materials checked out to the size of the collection. It is the number of materials circulated divided by the number of volumes held. Turnover rate indicates how often each item in the collection was lent, thus this measure is relevant to use of the collection. It may be useful to compare this figure to selected inputs such as volumes held per capita, and outputs such as circulation per capita and ILLs per 1,000 circulation.

VIDEOS PER 1,000 SERVED
Videos per 1,000 Served relates the number of video materials in the library's collection to the size of the population it serves. It is the number of video cassettes (or disks) divided by the population served in thousands. This statistic is a measure of the size of the library's video collection relative to the population it serves.

VISITS PER CAPITA
See *Library Visits Per Capita*

VOLUMES PER CAPITA
Volumes per Capita relates the number of volumes or units in the library's collection to the number of persons it was established to serve. It is the number of print volumes held by the library divided by its legal service area population. This figure indicates the average number of volumes held for each person in the library's legal service area population. This input measure may be relevant whenever the size of the library's collection is an issue. It is particularly useful when the population or geographical area which the library is established to serve changes dramatically. For example, in the latter case, there should be corresponding increases in Materials Expenditures as well as Volumes Held just to maintain the existing ratio of holdings to persons served.

COMPUTER FILES PER 1,000 SERVED
Computer files per 1,000 Served relates the number of materials in computer file formats in the library's collection to the size of the population it serves. It is the number of computer file format materials divided by the population served in thousands. This statistic is a measure of the size of the library's computer file collection relative to the population it serves.
